

*Curved beamwork and windows
create a pleasing
and unified theme*

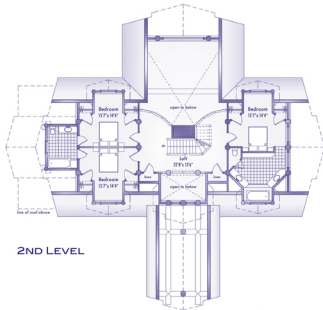

SAGUENAY

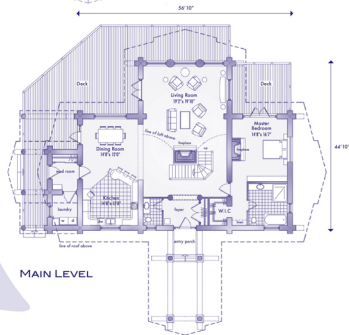

The Saguenay is a true work of art. Featuring curved beamwork on the gable and trusses, large arched dormer windows and log accents, and curved lofts and balconies provide a pleasing and unified theme throughout the entire home. It also features a central winder staircase that wraps around the stone fireplace in the Great Room, making for an exceptional exquisite log home experience.

Unique to this home is a log port-cochere, which lets you drive right up to your front door when the weather's not the best. And when you first walk through the doors of the Saguenay, you're greeted by two massive log posts and the vaulted ceiling of the main foyer – a truly welcoming (and impressive) sight.

Perfect for families, this home features a large kitchen with a four-seat island, four bedrooms and four baths – including two master bedroom suites with a private fireplace, walk-in closet, soaker tubs, and access to private covered decks.
