BONNECHÈRE

The Bonnechère doesn't have just one distinguishing feature – the entire home is a stunning example of pure log home luxury. First, there's the huge sunken living room that combines the best of two worlds – it's open and grand, yet still cozy and inviting.

The kitchen might be even more impressive, with its double-sided fireplace (the other side opens up to the living room), walk-in pantry, convenient mudroom access, and a spectacular island bar with room enough to comfortably seat six people.

Or perhaps you'll appreciate the two gorgeous master bedroom suites, which are both equipped with private fireplaces, soaker tubs and walk-in showers.

And we haven't even mentioned the expansive covered decks, Juliet balcony, or walk-in closets. While it may feature a simpler layout with classical roof lines and gable, the Bonnechère is anything but ordinary.
